Transfer Pricing Developments Around the World 2020

In the rapidly evolving landscape of international taxation, transfer pricing developments around the world 2020 stand out as a pivotal year marked by significant policy shifts, increased enforcement, and evolving standards. As globalization accelerates and digital economies expand, governments and multinational enterprises (MNEs) alike have had to adapt to a complex web of rules and expectations designed to prevent profit shifting and ensure fair tax contributions. This article provides a comprehensive examination of the key developments, trends, and implications of transfer pricing in 2020, offering insights for tax professionals, policymakers, and scholars alike.

The Global Context of Transfer Pricing in 2020

Transfer pricing rules that govern transactions between related entities within an MNE has long been a focal point of international tax policy. The core challenge remains aligning profit allocation with economic substance, yet the nuances and enforcement mechanisms vary considerably across jurisdictions.

In 2020, the ongoing digital transformation, coupled with the COVID-19 pandemic's economic fallout, intensified scrutiny on transfer pricing practices. Governments aimed to protect their tax bases amid declining revenues, while the OECD's ongoing efforts to reform international tax rules gained momentum. This year became a nexus of regulatory activity, enforcement, and strategic adjustments by multinational corporations.

Key Transfer Pricing Developments in 2020

The year 2020 saw a confluence of major policy initiatives, legislative changes, and enforcement actions that collectively shaped the transfer pricing landscape. The following subsections detail these developments.

1. OECD's Pillar One and Pillar Two Progress

One of the most significant developments was the OECD's continued work on the Two-Pillar Approach to Addressing the Tax Challenges of the Digital Economy.

- Pillar One: Focuses on reallocating taxing rights for multinational enterprises, especially digital giants, to jurisdictions where consumers are located. While the implementation was initially targeted for 2020, progress was delayed due to the pandemic, with discussions extending into 2021.

- Pillar Two: Introduces a global minimum corporate tax rate, aimed at reducing profit shifting incentives. In 2020, countries like the U.S., UK, and members of the G20 began publicly endorsing the principles, signaling a shift toward more coordinated international minimum tax rules.

Implications: These initiatives signal a move away from unilateral transfer pricing adjustments towards multilateral, rule-based solutions that aim to reduce tax competition and base erosion.

2. Increased Enforcement and Documentation Requirements

Many jurisdictions intensified their audit activities and tightened documentation standards in 2020.

- United States: The IRS increased scrutiny on transfer pricing documentation, emphasizing the importance of contemporaneous documentation and the "best method" selection. The IRS also issued new guidelines for audit procedures during the pandemic.

- European Union: The EU's Code of Conduct Group prioritized transfer pricing audits, focusing on aggressive tax planning and profit shifting within member states.

- Developing Countries: Countries like India, Brazil, and South Africa ramped up enforcement, introducing stricter transfer pricing audits and penalties to safeguard revenue.

Implications: MNEs faced higher compliance burdens and increased risk of adjustments, prompting a reevaluation of transfer pricing policies and documentation practices.

3. Digital Economy and Intangible Assets

The proliferation of digital business models and intangible assets (IP, data, algorithms) intensified transfer pricing challenges.

- Valuation of Intangibles: Countries scrutinized the transfer of IP and digital assets, demanding robust valuation analyses. The use of profit split methods gained prominence over traditional transactional methods.

- Profit Allocation: The concept of "user contribution" and "value creation" in digital transactions became central, with some jurisdictions proposing specific rules to tax digital activities more effectively.

Implications: Transfer pricing policies increasingly focus on the economic substance of digital transactions, requiring advanced analytical approaches and careful documentation.

Regional and Jurisdictional Highlights

Understanding the nuances of transfer pricing developments requires examining specific regions and countries.

United States

- The Tax Cuts and Jobs Act (TCJA), enacted in late 2017, continued to influence transfer pricing strategy in 2020, particularly with regard to the new GILTI (Global Intangible Low-Taxed Income) and BEAT (Base Erosion and Anti-Abuse Tax) regimes.
- The IRS issued final regulations clarifying the transfer pricing documentation and transfer pricing methods, emphasizing the importance of the "best method" and the comparable uncontrolled price method.
- Increased focus on cost-sharing arrangements and intangibles transactions, with audits targeting valuation and transfer of IP rights.

European Union

- The EU's Anti-Tax Avoidance Directive (ATAD) and the Mandatory Disclosure Rules (DAC 6) increased reporting obligations for aggressive tax planning.
- Several member states adopted country-by-country reporting requirements, aligning with OECD standards.
- The EU's efforts to combat profit shifting included increased transfer pricing audits and the implementation of the Code of Conduct Group's recommendations.

Asia-Pacific

- India introduced new transfer pricing documentation requirements, including detailed disclosures on intangibles and risk assumptions.
- China continued to refine its transfer pricing rules, emphasizing the arm's length principle and increasing penalties for non-compliance.
- Australia and Japan aligned their transfer pricing rules more closely with OECD guidelines, with particular attention to digital transactions.

Developing Countries

- Countries like Brazil and South Africa increased enforcement efforts, leveraging digital tools to identify non-compliance.
- Many developing nations issued new transfer pricing regulations, often with simplified compliance procedures but heightened penalties for violations.
- The COVID-19 pandemic prompted some nations to temporarily relax certain documentation requirements, balancing enforcement with economic hardship.

Challenges and Controversies in 2020

Despite progress, the year was not without controversy and ongoing challenges.

1. Digital Taxation and Unilateral Measures

- Several countries, especially in Europe and Asia, proposed or implemented unilateral digital taxes (e.g., France's digital services tax), raising concerns about double taxation and trade disputes.
- The OECD's multilateral solutions aimed to address these issues, but disagreements persisted, complicating international consensus.

2. Transfer Pricing and COVID-19

- The pandemic caused disruptions in global supply chains, leading to questions about the applicability of existing transfer pricing methods.
- Governments debated whether to relax certain compliance deadlines or adjust profit margin benchmarks, but consensus was limited.
- MNEs faced increased scrutiny over transfer pricing adjustments related to pandemic-induced losses and transfer of risks.

3. Data and Transparency Issues

- The increased emphasis on transparency, including country-by-country reporting, posed challenges related to data privacy, confidentiality, and administrative capacity.
- Some stakeholders argued that data collection and analysis efforts were still insufficient to effectively combat transfer pricing abuse.

Future Outlook and Recommendations

Looking ahead, several trends and considerations are likely to shape transfer pricing developments

in the coming years.

- Global Minimum Tax: The implementation of a worldwide minimum tax rate could profoundly impact transfer pricing strategies, incentivizing more transparent and compliant arrangements.
- Digital Economy Focus: As digital transactions grow, expect more tailored rules and guidance on valuation, profit allocation, and digital services taxation.
- Enhanced Data Analytics: Tax authorities will increasingly leverage advanced data analytics and artificial intelligence to identify transfer pricing risks.
- International Cooperation: Continued efforts through the OECD and G20 aim to harmonize rules, reduce double taxation, and combat base erosion.

Recommendations for MNEs:

- Maintain comprehensive, contemporaneous documentation that clearly supports transfer pricing positions.
- Engage in proactive dialogue with tax authorities, especially regarding digital and intangible transactions.
- Monitor evolving international standards and adjust transfer pricing policies accordingly.
- Invest in data management and analytics capabilities to ensure compliance and risk mitigation.

Conclusion

Transfer pricing developments around the world 2020 marked a crucial year characterized by increased regulatory activity, international cooperation, and strategic shifts by both governments and MNEs. While progress was made towards a more coordinated global approach, challenges remain, particularly in addressing the complexities of digital economies and ensuring fair tax contributions. As the international community advances towards broader reforms, stakeholders must remain vigilant, adaptable, and committed to transparency to navigate this dynamic landscape successfully.
